

Multimedia 508 Compliance

SemanticBits can produce video files that are compliant with the Section 508 standards for Web-based Intranet and Internet Information and Applications. This pertains only to video file clips that are intended to be distributed online via the Web.

When packaging files for inclusion in HTML pages, SemanticBits can ensure the following:

- Document file name will not contain spaces or special characters.
- Document file will be concise, generally limited to 20-30 characters.
- Document file name will not contain spaces or special characters and is no more than 20 characters.
- All video, animation, etc., files are captioned with captioning synchronized to the actions and dialogue.
- All audio files have accompanying transcripts.
- Graphics, animations, movies, or other objects will avoid strobing, flickering, or flashing effects.
- A text-only version is provided when there is no other way to make the content accessible. (Example: An animation must have a text equivalent.)
